

Product Range: Defence, Mining and Wind Turbines

Special Forged Components

- Forged Rings
- Forged Pinions
- Forged Bars
- Forged Blocks
- Forged Vessels
- Forged Tube sheets
- Forged Covers
- Self-Reinforced Flanges & Forged Nozzles for high pressure components with complex couplings ends (Cylindrical, Spherical, Slanted Planes, Saddles)
- Forged manufactured Shafts in different forms - with Cantered Head, Lateral, Dual Head, Square Head

Main Bearing Products

- Geared rings (Integral, Split, Segmented)
- Four-point contact bearings
- Eight-point contact bearings
- Cross roller bearings
- 3-row roller bearings
- Combined bearings
- Profile bearings
- Design of other bearing types for special applications

Additional Products

- Female Pinion Gears
- Male Pinion Gears
- Linear Rack Gears with either Single or Dual side Gearing roller bearings
